

New Moon Newsletter Scorpio 2011

The latest highlights from my desk

The [Scorpio New Moon](#) is ruled by Mars and Pluto, the gods of war and death. Intense times! Where you have Scorpio in your chart is where you need to merge energy with others to create something new. This erotic ([of Eros](#)) merging cannot happen until the umbilical ties with the past are cut. Essentially, [Scorpio](#) is about the enticement to leave the juvenile bonds that link us dependently with others so we may form adult-to-adult relationships. Also this is an area in the chart where we benefit by letting go, eliminating tolerations and owning our power. For more ideas and support [check the New Moon Scopes](#).

Talks: I am doing a group call over at [GVU](#) on Oct 25th. Not a member? You can dial in to my the monthly [Align with the Stars](#) and ask questions!

Blogs: On the 16th of every month, I'm blogging over at the [Supernatural Underground](#). Also you can find my recent guest posts at [Voyager Books](#), [Collins Book Shop](#) (*on creating the Lupins from scratch!*) and check the Recent interview by [Rowean Cory Daniells](#). She's a great Spec Fic writer and asked some fab questions.

Audio Sample: I've a pretty cool [audio sample](#) from Journey by Night – a scene with Jarrod, Teg (very deep voice) Rosette and Winsor Trace. Let me know what you think!

Astro-LOA: In the time of Scorpio we 1) find what is not working 2) let it go 3) move on. This is about transformation and growing a soul. Issues of power come up. Be ready to own yours! Also, when it comes to joint finances, remember, letting go can equate with *huge* gains. Really? Check out Jeannette Maw's [Money Maths for Deliberate Creators](#).

Namaste all!

Have a wonderful November!
